

Polypropylene Anti-Skid ESD Blue Shoe Cover

Part Number: VTSHCVASESDF

Description:

Contamination control, disposable shoe covers lightweight, yet strong and durable, with breathability for comfort. 14" fabric conductive ribbon, stitched on sole seam provides ESD grounding.

Physical Characteristics:

Nonwoven 100% spunbond polypropylene with stitched seams. Sprayed latex anti-skid treads on bottom for safety. 20" fabric conductive ribbon on sole. Individually inspected for seams, sizing, material and workmanship.

Length: LG - 15" XL - 18" (+/- 0.5")
Width: 7" (+/- 1 mil)
Material Weight: 40 grams/m²

Test Methods:

Product conforms to the following test standards:

IES-RP-CC-003.2
IEST-RP-CC003.2

Recommended Practice for Cleanroom Garments
Classification specification exists for this item, an independent test laboratory would classify particle cleanliness into high Category I or low Category II.

Test Results:

Particles >0.5 mμ/minute 147 average
Particle Cleanliness, Helmke Drum Method
P010:
Coefficient of friction: 0.60 μs

Color:

Blue

Packaging:

Stacked and rolled in poly bags
100/Bag, 3 Bags/Case
(150 Pair/Case)
White exterior, 5 layer/double walled carton
